	sisu-cr-0.10.3. update	/							
7									

- 1. Select "Behavior" tab
- 2. Select "Ask each time" and close this window

Copy the update file, for example sisu-cr-0.10.3.update, to your desktop. Click with the right mouse button on icon of update file and select "Properties".

1. Select "Permissions" tab

2. Select "Allow executing file as program", close this window.

Do not change other settings on this tab, even if they are not the same as in the picture.

Double click with the left mouse button on update file and select "Run in Terminal". The update will start and then the system will reboot...

If you have upgraded to the SISU ULTIMA version and you have set up the SISU_CR autorun program, click the "1" icon, start typing "startup application", and when the "2" icon appears, click it.

Uncheck the SISU_CR icon.
